## HASPRO MOTO

Travelling at speeds greater than 120 km/h, noise levels can easily exceed 98dB. This can cause disorientation, leading to tiredness, a lack of concentration.

As such, the aim of our earplugs is to keep you safe and alert, letting you enjoy the pleasure of the open road without worrying about sensory impairment.

## HASPRO SWIM

Expertly crafted earplugs for those who frequently hit the pool. These earplugs offer reliable and effective protection against water penetration, keeping your ears dry and free from discomfort. Designed with a built-in filter, they reduce background noise while still allowing for clear communication.
