

HASPRO **NOX 5F** Earmuffs

The **NOX 5F** earmuffs offer hearing protection for professionals working in a variety of noisy environments.

As such, HASPRO **NOX 5F** earmuffs are a perfect solution for anyone who works in the following areas:

- At airports
- In factories
- In engine rooms
- In the mining industry
- In printing houses
- On construction sites
- and many more!

Optimal hearing protection and safety standards

The NOX 5F offers a noise reduction level with an SNR of 34 decibels. Higher frequencies that fall within the range of 2,000 to 8,000 Hz – typical for an industrial environment – are reduced to an even greater extent, by up to 40dB. HASPRO NOX 5F earmuffs also come equipped with a yellow stripe on the ear cups. This improves visibility of the wearer, vital for those working in any environment with reduced visibility, such as dark areas or places with high volumes of traffic.

Maximum comfort

HASPRO NOX 5F earmuffs have been specially designed for prolonged use. Made using modern, lightweight materials, they weigh in at just 340 grams, making them suitable for use across many hours without causing discomfort. The space left between the user's ear canal and the earmuffs' insulation layer allows for better ventilation, reducing the buildup of moisture and heat. NOX 5F earmuffs also feature larger, softer, moisture resistant ear cushions that offer a better fit and a further reduction in the risk of water absorption.

Adaptable fit

For greater comfort and convenience, the product's headband can be easily adjusted to offer the desired fit of each user.

Modern and resistant construction

Industrial environments are often characterized by demanding, physical work that comes with an inherent risk of bumps and scrapes. This is precisely why the HASPRO NOX 5F earmuffs have been made using shock resistant materials that can withstand the intensity of manual labor.

HASPRO NOX 5F earmuffs are also fully foldable. This makes them portable and easy to store – meaning they are always to hand when you need them.

SET CONTAINS:

- ✓ 1 pair of HASPRO earmuffs

- ✓ Multi-language instructions

RECOMMENDATIONS:

Always use hearing protection when you are in a noisy area. Before each use, wash your hands and make sure the earmuffs are clean.

HASPRO earplugs are a certified product, complete with the CE mark and certificates of compliance with the European Safety Standard EN 352-1: 2002.

TECHNICAL DATA:

Producer	HASPRO
Type	Safety Earmuffs
Specification	Hearing Protection
Attenuation	SNR:32dB
Compliance w norm	CE, EN 352:1:2002
Size of the packaging	20x15,5x10 [cm]
Size of the earplug	170mmx93mmx158mm (±2mm)
Weight of the packaging	340g

ATTENUATION CHART

1	Frequency, Hz	125	250	500	1000	2000	4000	8000
2	Average Attenuation, dB	22.6	21.2	29.4	39.9	37.9	43.6	41.8
3	Standard Deviation, dB	298	2.8	2.7	2.7	2.7	3.1	3.3
4	Assumed Protection, dB	19.9	18.4	29.7	37.1	35.2	40.5	38.5

EN 351-2-2002, H: 37dB M: 29dB L:22dB SNR: 32dB

Why is hearing protection so important?

High noise levels aren't just bad for our hearing, they can have a negative impact on our concentration, efficiency, and overall wellbeing. The longer we remain exposed to excessive noise, the faster we feel tired. This can cause fatigue, headaches, and dizziness, with further health complications also possible.
